Addition to introduce numerical approximation of the traditional content, but also introduced a number of new theories and methods of multivariate interpolation, multivariate orthogonal polynomials, numerical integration of high-dimensional multivariate spline curves, surfaces generated approximation, which also includes the Editor's some research. Book can serve as the Higher Education Information and Computing Science professional Textbook, as other science and engineering master's, doctoral student textbook or reference book. The book is also available for scientific research and engineering and technical personnel reference.
