Taylor & Francis Inc. Paperback. Condition: new. BRAND NEW, Removing the Barriers to Efficient Manufacturing: Real-World Applications of Lean Productivity, Daniel L. Ferguson, W. Edwards Deming's central premise was that improvements in product quality would increase productivity, improve competitive position, and help ensure long-term survival. Point 12 of his landmark 14 Points for Management says that management's job is to remove the barriers that keep people from taking pride in their work. That's exactly what this book is about. Shedding new light on Deming's 14 Points, *Removing the Barriers to Efficient Manufacturing: Real-World Applications of Lean Productivity* outlines time-tested organizational structures and methods to help you reduce variability and deliver high-quality products consistently. Instead of taking you on a "random walk," the book supplies each manufacturing group in your organization with straightforward directions for creating a smooth-running facility with reduced variability. It includes "work assignments" in each chapter that, if completed in the order presented, will guide you through the creation of the Model Vision for your manufacturing facility. It also: \* Covers key topics on working with people, including training and retraining \* Supplies pointers for working with unions \* Considers Single Minute Exchange of Die (SMED) \* Describes how to put it all together with action plans The book includes a write up on Deming's famous Red Bead Experiment as well as an introduction to statistical process control techniques in the appendices. Filled with real-world examples and a case study to illustrate essential concepts, the book arms you with the insight and common-sense approaches required to build on Deming's fundamental principles and consistently deliver high-quality products that instill...
