

Energy Revolution: The Physics and the Promise of Efficient Technology

By Mara Prentiss

Harvard University Press. Hardback. Book Condition: new. BRAND NEW, Energy Revolution: The Physics and the Promise of Efficient Technology, Mara Prentiss, Energy can be neither created nor destroyed but it can be wasted. The United States wastes two-thirds of its energy, including 80 percent of the energy used in transportation. So the nation has a tremendous opportunity to develop a sensible energy policy based on benefits and costs. But to do that we need facts not hyperbole, not wishful thinking. Mara Prentiss presents and "interprets political and technical information from government reports and press releases, as well as fundamental scientific laws, to advance a bold claim: wind and solar power could generate 100 percent of the United States average total energy demand for the foreseeable future, even without waste reduction. To meet the actual rather than the average demand, significant technological and political hurdles must be overcome. Still, a U.S. energy economy based entirely on wind, solar, hydroelectricity, and biofuels is within reach. The transition to renewables will benefit from new technologies that decrease energy consumption without lifestyle sacrifices, including energy optimization from interconnected smart devices and waste reduction from use of LED lights, regenerative brakes, and electric cars. Many...
